

Superlite front brake kits for all early Ford Bronco models, upgrade factory drum or disc brake front axles to state-of-the-art performance for modern power or big heavy off-road tires.

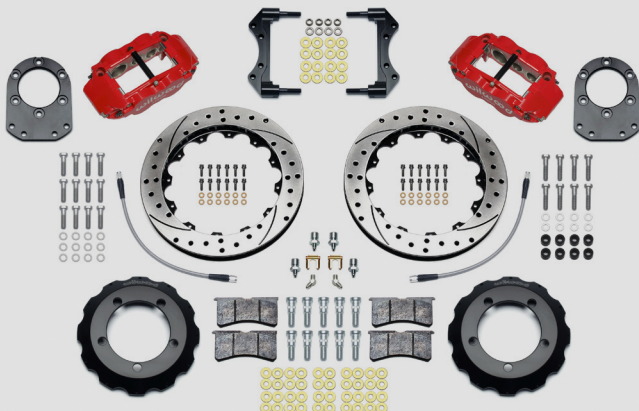

Kits to fit all 1966-77 Broncos with factory manual or power, disc or drum brakes, and Dana 30 or 44 axles.

### **CALIPERS: Forged Narrow Superlite**

- Stress-flow forged aluminum and finite element analysis allows superior strength and efficiency, with more clamping force without increased mass or pedal effort
- High-strength steel main bridge bolts in tension provide maximum resistance to body separation, supplemented by a center bridge bolt to minimize deflection
- Six stainless steel pistons with heat resistant seals for consistent performance under extreme conditions
- Caliper bores and body hard anodized with tough, abrasion-resistant Mil-Spec Type III aluminum-oxide ceramic

### **ROTORs: *Spec37* Iron 12.88" or 14.00" x 1.25"**

- Proprietary high friction, low distortion iron alloy developed for extreme demands of armored military vehicles
- Ventilated with 48 curved vanes to pump air and shed heat quickly
- 12.88" diameter fits under most 17" wheels
- 14.00" diameter fits under most 18" wheels

### **BRAKE PADS: BP-10 *SmartPads***

- Performance *SmartPads* work well when cold and resist fading when hot, with consistent, predictable engagement
- Optional compounds also available for fine-tuning response to driver preference and available traction

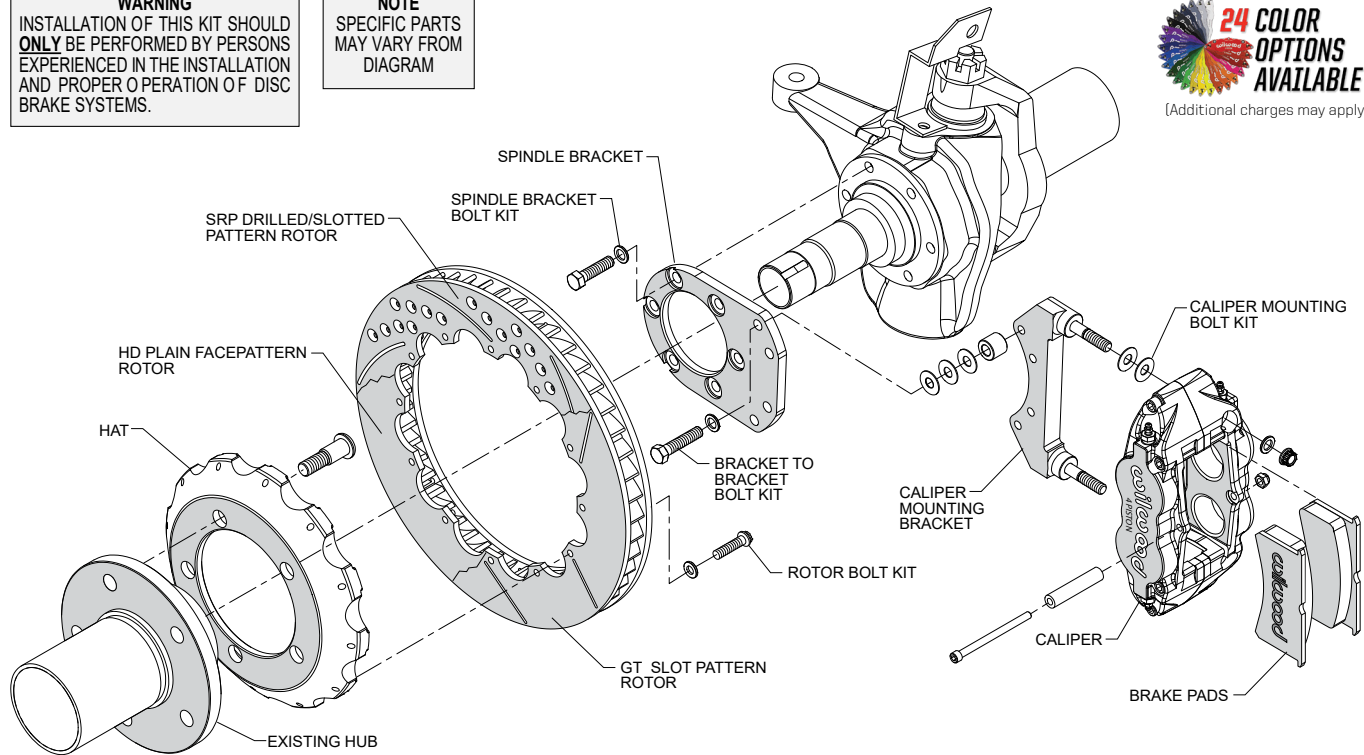

### **Forged Aluminum Mounting Hats and Brackets**

- Forged aluminum rotor mounting hats dramatically reduce weight compared to factory iron parts
- Radial mount brackets allow fine tuning of alignment in two planes
- Kit includes braided stainless flexlines and premium grade hardware

**WARNING**  
INSTALLATION OF THIS KIT SHOULD **ONLY** BE PERFORMED BY PERSONS EXPERIENCED IN THE INSTALLATION AND PROPER OPERATION OF DISC BRAKE SYSTEMS.

**NOTE**  
SPECIFIC PARTS MAY VARY FROM DIAGRAM

**24 COLOR OPTIONS AVAILABLE**  
(Additional charges may apply)

Typical Installation Configuration (12.88" Kit Shown)
