

## FOR IMMEDIATE RELEASE

### Wilwood Disc Brakes has just introduced two new brake kits for 1970-1973 Mustangs

Camarillo, CA January 20, 2011

Wilwood Engineering has just released two new front drag kits for '70-'73 Mustangs that complement our current selection of street brake kits. The part number [140-11930](#) Front Drag Kit features Dynalite calipers and 11.75-inch drilled steel rotors. FDL Front Drag kits are drag racing's most popular front brake kits. In addition to the '70-'73 Mustangs, the FDL kits are available for the popular muscle car spindles and select aftermarket front struts used on four-wheel disc cars weighing up to 2,800 pounds, or rear drum brake equipped cars weighing up to 2,400 pounds. Forged billet FDL four piston calipers mount directly to the spindle with a bolt-on bracket. Forged billet, five lug hubs with direct mount steel rotors combine to provide an average weight savings of over 30 pounds compared to stock drum or disc brakes. Kits include all new hardware, wheel bearings, seals and extra length lug studs both kits feature aluminum hub assemblies, Forged Dynalite calipers, aluminum rotor adapter plates caliper brackets, BP-10 Smart pads and all of the hardware required to finish the installation.

Wilwood performance drag kits are loaded with cutting edge technology built on years of domination in world motorsports and are engineered for easy bolt-on installation. Wilwood's brake enhancement kits are designed to meet the high performance demands of today's tire, wheel and suspension technology.
