

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Street and Track Big Brake Kits for 2013-20 Honda Civic

Camarillo, CA • January 2022

Wilwood has added two new big brake kits for the 2013-2020 Honda Civic featuring Superlite calipers and 12.88" (327mm) rotors. More than 1-inch in diameter larger than stock, and manufactured using proprietary Spec37 iron, these rotors deliver more brake torque and resist distortion from extreme heat. Motorsports-proven Superlite calipers have less deflection so more pedal effort is directly converted to clamping force.

High-strength, forged aluminum calipers and six stainless steel pistons and differential bores generate balanced braking force in high-tech style. Track kits include two-piece Thermlock® thermal-barrier pistons with a stainless heat shield and aluminum body, and 48 directional vane GT slotted rotors. Track calipers are Type-III hard anodized for maximum durability. Street kits are available with slotted or drilled and slotted rotors, with your choice of gloss red or black powder coat, with 22 optional colors available (additional charges may apply).

MSRP: starts at \$2,040.91
