

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Mechanical Parking Brake Caliper in New Sizes

Camarillo, CA • May 2023

Wilwood has added new MC4 stand-alone mechanical parking brake caliper sizes, now available for 11.00"-14.00" diameter rotors in .25"-1.10" widths. The larger units are sized for use on the rear of many cars and trucks. The newly released smaller units are ideal for various powersports or similar machines with .25" or .38" wide rotors.

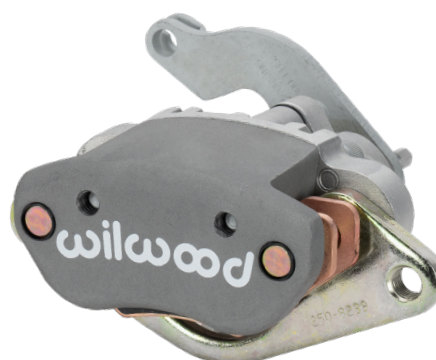

The Wilwood MC4 mechanical caliper is constructed of die-cast and forged aluminum for lighter weight, with a steel bracket and lever arm for strength. Right and left-handed options are available each with a lever cartridge that can be clocked in three locations for optimum positioning and ease of cable routing. The 1.19" aluminum piston is fully dust booted to keep moisture and debris out. These compact calipers are included with many Wilwood rear brakes kits but are also popular for adapting to custom projects. Caliper bodies are available in gloss red or black powder coat, or Type-III hard anodized coating.

MSRP: starts at \$149.13

**Right-Hand Pull, 2.00" Offset Mount Holes
Gloss Red Powder Coat Finish**
