

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Aero6-DM Direct-Mount Brake Kits for Toyota Tacoma

Camarillo, CA • December 2023

Wilwood has engineered new Aero6-DM direct-mount bolt-on brake kits for 2015-21 Toyota Tacoma trucks that work with most 17" and larger wheels. These kits are designed to be fully-compatible with factory rear brakes, master cylinder, ABS, and computer systems. The Aero6-DM kits provide more holding power, easier modulation at low speeds, and more thermal capacity for high-demand highway and off-road applications, including towing, hauling, and commercial use.

Forged aluminum six piston Aerolite direct-mount calipers are optimized to bolt directly to the Toyota spindle and deliver improved clamping force. Rotors are 13.31" x 1.25" premium long-grain carbon, iron alloy, substantially increasing braking performance when paired with new Wilwood SmartPad™ BP-"Q" ceramic-based compound, dual-sport brake pads, formulated for everyday street or performance driving. Rotors are available GT slotted or SRP drilled and slotted. Calipers are available in gloss red or black powder coat, and 22 additional color choices (additional charges apply). Stainless braided Flexline kits are included.

MSRP: starts at \$1,787.51
