

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Aero6-DM Direct-Mount Brake Kits for Toyota Tundra

Camarillo, CA • December 2023

Wilwood has engineered new Aero6-DM direct-mount easy bolt-on brake kits for 2022 Toyota Tundra trucks that work with most 17" and larger wheels. These kits are designed to be fully compatible with factory rear brakes, master cylinder, ABS, and on-board computer systems.

The Aero6-DM kits provide more holding power, easier low-speed modulation, and a better pedal feel for more confident braking in daily street performance. Larger pads and rotors provide greater thermal capacity for high-demand highway, off-road applications, towing and hauling, and commercial workloads.

Forged aluminum six piston Aerolite direct-mount calipers are optimized to bolt directly to the Toyota spindle delivering improved clamping force. Rotors are 13.56" x 1.30" premium long-grain carbon, iron alloy, substantially increasing braking performance when paired with new Wilwood SmartPad™ BP-"Q" ceramic-based compound formulated for everyday street or performance driving. E-coated 48 vane rotors are available in GT slotted or SRP drilled and slotted. Calipers are available in gloss red or black powder coat, and 22 additional color choices (additional charges apply). Stainless steel braided Flexline kits are included.

MSRP: starts at \$1,787.51
