

FOR IMMEDIATE RELEASE:

## Wilwood Disc Brakes Releases Single Pedal Assemblies for Tandem Master Cylinders

Camarillo, CA • April 2024

Wilwood engineered new pedal assembly bases to accommodate their popular Tandem Master Cylinder lineup for both floor and swing mount applications. These forward-mounting bases are easy to install and include necessary hardware for most master cylinder or clutch actuation systems.

Incorporated into each new model are Wilwood's unique adjustable designs. The foot pedal pad can change the horizontal position up to 1" for driver preference, and a movable pad head has three positions to change the pedal ratio. Three pedal ratios allow the fine-tuning of feel and performance. The floor mount model offers 5.25:1, 5.62:1, and 6.00:1, and the longer arm swing mount offers ratios of 6.25:1, 6.62:1, and 7.00:1. All pedal arms are manufactured using high-strength, lightweight forged aluminum.

The new pedal bases are also available separately along with a wide variety of accessories. Including pedal covers, a trim plate, adjustable pedal heads, different length arms, and bolt kits.

MSRP: starts at \$173.93
