

**FOR IMMEDIATE PRESS RELEASE:
Wilwood ProMatrix Upgrade Rotors for C5 and C6 Corvettes**

Camarillo, CA June 3, 2010

Wilwood Disc Brakes has applied many of the techniques learned during its 30-year racing heritage to these OE replacement rotors for C5 and C6 Corvettes. Engineered to meet the demands of Corvette owners for high performance street driving and track day sessions, these [ProMatrix Series Rotors](#) offer the high-tech look of a directional cross-drilled and slotted face pattern with a bright zinc wash for protection against rust and corrosion. In addition to the aesthetic appeal, the venting and cleaning action of the hole and slot pattern reduces pad glaze and minimizes irregular pad build up on the face of the rotor.

When matched with Wilwood ProMatrix Disc Brake Pads, the results are improved pedal feel and smother engagement with improved braking response.
