

FOR IMMEDIATE RELEASE:

Wilwood Engineering's New Residual Pressure Valves

Camarillo, CA • October, 2015

Wilwood's next generation Residual Pressure Valves (RPV) deliver the same outstanding performance and reliability as their previous versions but in a sleek new, fully detail-machined design. The valves are available with 2 or 10 pound pressure ratings to maintain minimal line pressure and prevent excessive pedal travel during initial engagement on disc or drum brake systems. Valves with 1/8"-27 NPT female ports are available individually, or packaged with two 3/8"-24 inverted flare female adapter fittings to accommodate 3/16" double flared hard lines. The valves are precision machined from billet aluminum and color coded with red or blue bright anodizing for easy identification.

New part numbers are:

[260-13706](#) • 2 pound valve

[260-13707](#) • 10 pound valve

[260-13783](#) • 2 pound valve with fittings

[260-13784](#) • 10 pound valve with fittings

M.S.R.P. starts at \$19.38.
