

**FOR IMMEDIATE RELEASE:**

## **Wilwood Engineering Hires Geoff Buxton to Support Racers in the Field**

**Camarillo, CA • December 1, 2021**

After more than two decades of work with IndyCar, World of Outlaws, and USAC race teams, Wilwood Engineering is pleased to announce that Geoff Buxton has joined their team of field sales and support representatives. This team of experts spends every weekend at tracks around the country making sure racers get the most out of their brake systems.

Geoff Buxton, Wilwood's newest Racing division field sales and support representative

Originally from Australia, while most of his classmates were off to college, Geoff was working full-time, saving money and vacation days to travel to the U.S. and crew with an Australian Sprint Car team, unpaid. By 2000, he had become a full-time resident of the United States and a paid member of Randy Hannagan's World of Outlaws crew. While his first love is dirt short track, it only took a few short years until he was working on IndyCar and Champ Car World Series teams at the biggest, fastest paved circuits. His resume includes time with the Andretti and A.J. Foyt racing teams, as well as Indy Lights, Global Rallycross, Sprint, Midget, and other motorsports disciplines.

The entire Wilwood Engineering team is delighted to have such an experienced individual representing us in the field, and helping our customers at the track.

### **About Wilwood Engineering.**

Wilwood Engineering was founded by Bill Wood in 1977, Wilwood Engineering designs and manufactures high-performance disc brakes and components from their headquarters in Camarillo, California. Products are engineered and rigorously tested for any application, creating unsurpassed braking quality and performance with sleek, modern designs.
