

**FOR IMMEDIATE PRESS RELEASE:
Wilwood's Front Big Brake Kits for Nissan 240SX**

Camarillo, CA June 1, 2006

Wilwood has introduced a new front [Big Brake kit](#) designed to fit the popular rear wheel drive Nissan 240SX SE with 5 lug hubs. Features of this kit include high-strength Forged Billet aluminum Superlite 4 piston calipers in a choice of red or black finish. Large 12.9" diameter curved vane, vented rotors are zinc-washed for protection against rust and corrosion and come with face patterns that are drilled and slotted (SRP), or a slotted only (GT) version for high heat applications. Black anodized aluminum hats reduce rotating weight and enhance the look inside big wheels.

BP-10 compound "Smart Pads" provide quiet engagement and low dust performance on the street, with fast response, superb friction and high resistance to fade for those hot Drifting sessions.
