

"SMART PAD" BP-10 & BP-20 COMPOUNDS

BP-10 Compound

Heat Range: Low to Medium-High
Cold Torque: Medium
Hot Torque: Medium-High
Wear Rate: Medium

Applications:

- Light to medium braking dirt tracks
- Club sport and track day events
- Drag racing
- High performance street
- Motorcycle

BP-20 Compound

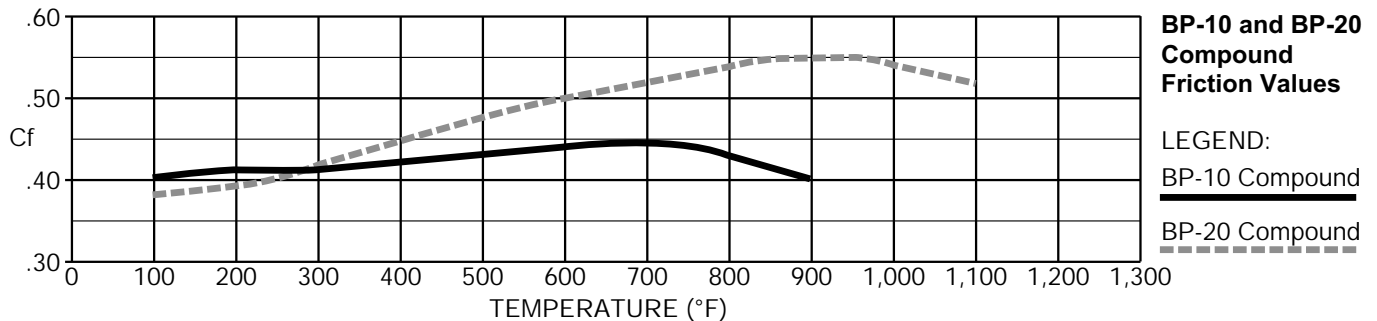

Heat Range: Medium to High
Cold Torque: Medium
Hot Torque: High
Wear Rate: Medium

Applications:

- Medium to heavy braking dirt tracks
- Advanced level track day & club sport competition
- Extreme duty dual purpose street/track vehicle
- High speed or heavy weight drag cars
- Hobby or sportsman category asphalt racing

BP-10 is an all new type of metallic-composite friction pad compound. BP-10 exhibits the medium to high temperature friction characteristics of a semi-metallic based race compound with the low temperature response, quiet engagement, and lowered dust levels normally associated with ceramic based street performance pads. The ability to realize all of these attributes from one compound provides opportunities for widespread application of this remarkable new material.

BP-20 provides increased friction levels with extended temperature range over BP-10. BP-20 has a progressive response rate as pedal pressure and temperatures increase to provide confident, repeated stops and outstanding modulation characteristics. The unique metallic composite formulation provides an aggressive feel without the harsh noise, high rotor abrasion, and extreme dust levels associated with high metallic based compounds.

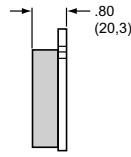

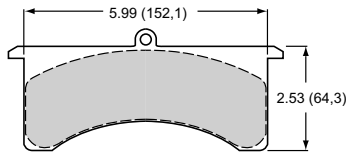

Ordering Information:

PAD TYPE	CALIPER	BP-10 P/N	BP-20 P/N	INTERCHANGE
6208	GP 300, GP 310	150-8733-2	—	FA095, FRP408, 7520/08, SBS566
6318	TC 6R	150-9118K	150-9411K	N/A
6407	SC Series	150-8990K	—	N/A
6617	W4A / W6A	150-9488K	150-9489K	N/A
7012	Dynalite Single / DLS	150-8937K	150-9412K	R20-12, 7757/12, HB104
7112	Dynalite w/Cotter Pin / DL	150-8850K	150-9413K	R302-12, 7752/12, HB100
