

DynaPro Single Caliper for Volkswagen

Wilwood's **DynaPro Single** opposed-piston calipers are fully CNC machined from premium-grade alloy billet using FEA (Finite Element Analysis). This design technique strengthens critical areas while increasing resistance to deflection (compliance) under load. The result is less fluid volume displacement which translates into increased clamping efficiency with less pedal effort.

DPS calipers for VW use heavy-wall stainless steel pistons better to resist corrosion and slow heat transfer from the pads. Choose from many available brake pad compounds to suit your application.

CALIPER FEATURES

- Motorsports-proven **DynaPro DPS** opposed piston caliper, re-engineered for direct replacement use on classic VWs
- CNC-machined from premium-grade billet aluminum with heavy wall stainless steel pistons
- Finite element analysis design maintains structural integrity to reduce deflection and increase clamping efficiency
- Two 1.62" (41mm) pistons sized to work with factory master cylinder
- Calipers available in Type-III Hard Anodized, gloss red or black powder coat finish
- High-performance, fade-resistant **SmartPad** and **PolyMatrix** compound brake pads are available
