

Big Brake Kits for **No Limit Engineering** retrofit chassis with **ZG Spindle**

Chassis builder **No Limit Engineering** (NLE) machines their ZG spindles explicitly to form a solid foundation for aftermarket big brake kits on their custom retrofit chassis. Wilwood collaborated to engineer performance brake kits specifically to fit these spindles and chassis when used under high powered cars and trucks.

Every Big Brake Kit for the NLE ZG Spindle features:

- Radial mount six piston differential bore calipers
- Gloss red or black powder coat finish calipers, with 22 other optional colors (additional charges may apply)
- Proprietary Spec37 iron alloy rotors formulated for high-performance and low thermal distortion
- Option of GT slotted or SRP drilled and slotted rotors

Superlite 12.88" or 14.00" kit

- Motorsports proven stress flow forged aluminum Superlite FNSL calipers
- Removable bridge bolt reduces caliper deflection and simplifies pad changes
- 12.88" x 1.25" ventilated rotors with 48 directional cooling vanes, or 14.00" x 1.25" rotors with 72 vanes

Aerolite 14.00" kit

- Advance design stress flow forged aluminum Aerolite AERO6 calipers
- Large central bridge virtually eliminates deflection under severe braking
- 14.00" x 1.25" ventilated rotors with 72 directional vanes for cooling
