

**FOR IMMEDIATE RELEASE:  
Wilwood New Non-Coated Titanium and Stainless Steel Rotors**

**Camarillo, CA October 1, 2010**

Wilwood is now offering non-coated titanium and stainless steel scalloped, vented rotors for open wheel racecars. Through exhaustive metallurgy, dyno and racetrack testing the new non-coated rotors are equal to coated rotors in stopping efficiency and will offer a substantial cost savings to the customer. Both rotors are made to float at the mounting points to eliminate stress distortion from heat expansion and are very lightweight. The rotors ([160-11763](tel:160-11763)) work perfectly with the forged billet DynaPro calipers and Composition Metallic Formula Pads when used in the Brake Systems for Sprint Cars and Midgets.
