

**FOR IMMEDIATE RELEASE:**

## **Wilwood Disc Brakes Announces New Front Disc Brake Upgrade kits for the 1961-1968 Jaguar XKE**

**Camarillo, CA • January 2019**

Wilwood DynaPro 4R brake kits provide a high-tech modern solution to restore and upgrade the brake performance on classic-era Series I E-Type Jaguars. These kits use readily available Wilwood components to deliver confident stopping power, with increased cooling capacity from a 30-vane vented iron rotor and longer wear from a larger volume brake pad.

DynaPro 4R kits are engineered specifically for mounting to the Jaguar spindles, using the output of the factory master cylinder, with fitment inside the OE spoked wire wheels. These all-inclusive kits feature full bolt-on installation, without modification, and provide options for rotor style and caliper finish to match the preferred overall appearance of the car.

MSRP starts at \$1,108.79.
