

FOR IMMEDIATE RELEASE:

**Wilwood Disc Brakes Releases Universal Flexline Hose Kits for Solid Axles
Camarillo, CA • January 2024**

Wilwood has engineered two kit solutions to simplify the secure mounting of Flexline hoses to solid axle rear ends. Either kit, a Weld-On Tabs or 3" Axle Clamps, will assist the installer by including all necessary parts to attach calipers to the chassis hardlines.

The Weld-On Tab kit includes weld-on tabs to hold the chassis adapters within reach of the 12" Flexline-to-caliper connection with your choice of 45° or 90°, -3 to 1/8-27 NPT fittings at the caliper, and mount the -3 to 3/8-24 IF through the weld-on tab to a 3/16" chassis hardline which gets held in place by the provided retainer clips.

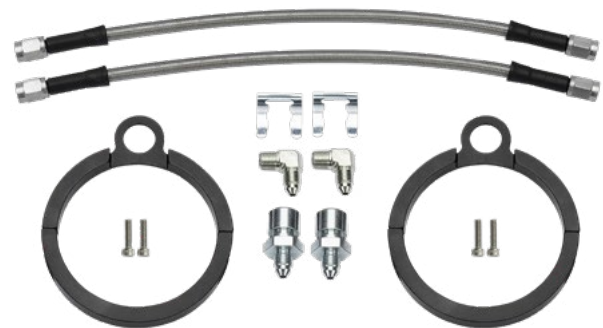

The 3" Axle Clamp kit includes 3.00" axle clamp-on brackets with line mounts to hold the 12" Flexline-to-caliper connection to a 3/16" chassis hardline. Choose either 45° or 90°, -3 to 1/8-27 NPT fittings at the caliper end, and mount the -3 to 3/8-24 IF through the mount on the axle clamp and hold in place using the provided chassis retainer clips.
