

**FOR IMMEDIATE PRESS RELEASE:
Wilwood Forged Superlite FSL4 and FSL4/ST Differential Bore Calipers**

Camarillo, CA June 10,2010

Wilwood's race proven FSL Caliper series has been expanded to include two new models with differential piston bores. Differential piston bores compensate for lead-edge mechanical loading and temperature variance across the pad face to reduce to pad taper in high temperature applications. Standard FSL4 calipers feature heavy wall stainless pistons. [FSL4/ST](#) models incorporate Thermlock® pistons for maximum protection against conductive heat transfer to the seals, fluid, and caliper body.
