

# ALUMINUM TANDEM MASTER CYLINDER

*Wilwood Tandem Master Cylinders represent the latest refinements in brake pressure actuation and fluid control. Available in four bore sizes as a stand-alone unit or in a kit.*

Master Cylinder Shown in Bright Burnished Finish. Left Hand Bracket Assembly Shown.

## Master Cylinder Features

- Available in four bore sizes: 7/8", 15/16", 1.00" and 1-1/8"
- Three finish options: standard aluminum, black e-coat, or bright burnished
- Features outlet ports on both sides for multiple plumbing options
- Compatible with manual or power brake systems
- Works well on vehicles with either rear drum or disc brakes

Master Cylinder Shown in Standard Aluminum Finish

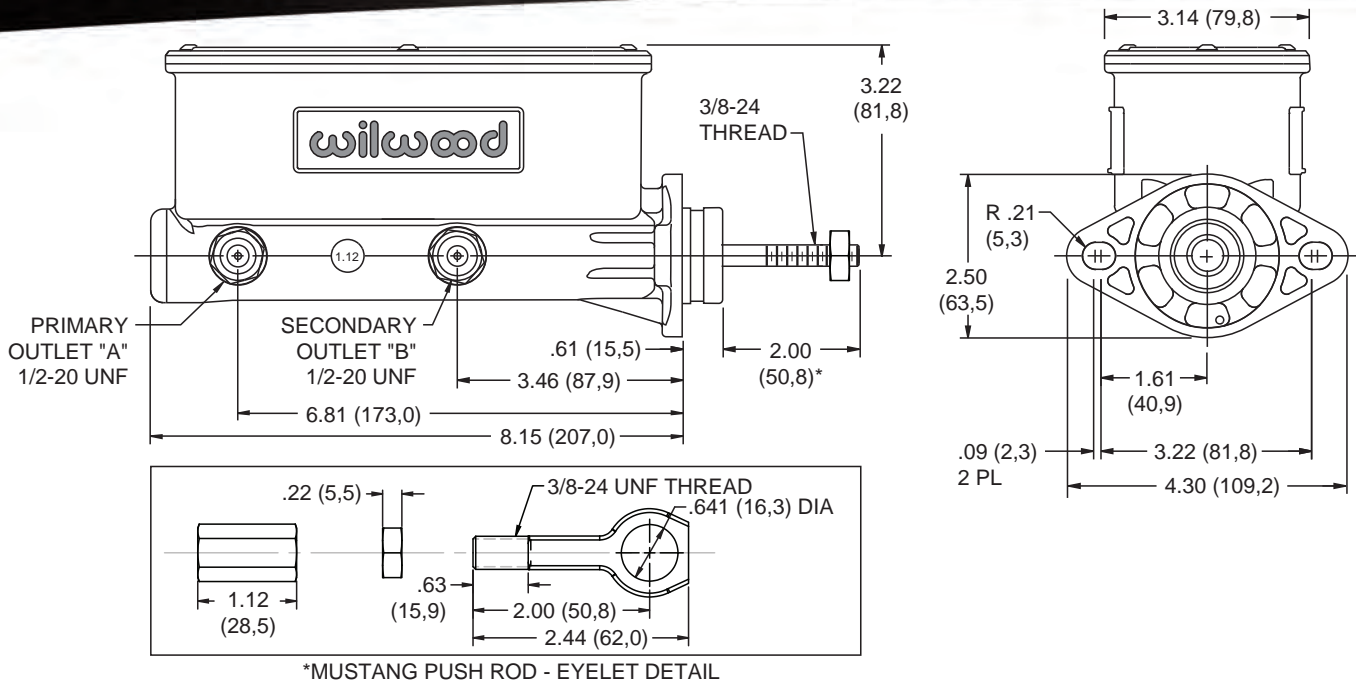

## Master Cylinder Kit Features

- Kit includes Tandem Master Cylinder, Combination Proportioning Valve, mounting bracket, fluid tubes and mounting hardware
- The Combination Proportioning Valve simplifies plumbing, wiring and brake bias adjustability
- Stainless steel fluid tubes are precision-bent with pre-installed stainless steel tube nuts
- Stainless steel button head fasteners thread into the bracket for a simple installation
