

FORD MUSTANG • 2015 AEROLITE 6R FRONT AND CPB REAR BRAKE KITS

Aerolite 6R front coupled with the Combination Parking Brake (CPB) rear brake kits for the 2015 Mustang provides the ultimate in brake performance and durability. An bolt-on upgrade brings style and class to an already classy muscle machine.

Kit Features

- Front Aerolite 6-piston radial mount forged aluminum calipers
- Combination hydra-mechanical rear parking brake caliper
- Two-piece **Spec 37** alloy staggered directional vane rotors, 15" for the front with 14" on the rear
- BP-10 compound *Smart Pads* with optional tuning compounds available
- Fully compatible with the OE ABS system and master cylinder output
- Radial mounting provides secure attachment to the caliper mounting bracket
- Stainless steel braided flexlines with DOT type reinforced coupler ends and protective outer jacket included
- The CPB caliper parking brake cable bracket accepts the OE cable end with minor modifications
- Bolt-on kits complete with detailed installation guide
