

# W6AR Caliper & Bracket Upgrade Kits for 1997-2012 Chevrolet Corvette Front Spindles

Wilwood Disc Brakes has recently introduced a front W6AR upgrade caliper and bracket kit that features the latest in big brake performance technology. This kit works with all 1997-2012 C5 and C6 Corvette front spindles either OE equipped or being upgraded to C6 Z51 13.4" or C6 Z06 14.0" rotors. This track-tested kit, [P/N 140-12629](#), provides big brake styling and real big brake stopping power for use in conjunction with wheel and tire upgrades for street, show, or track. This disc brake kit features Wilwood's Forged W6AR six-piston calipers that work perfectly with the OE master cylinder and ABS functions. The caliper is used with Wilwood "Smart Pad" BP-20 extreme duty dual-purpose street/track pad compound.

The W6AR six-piston calipers are available in red or black powder coating as well as Wilwood's new "Quick-Silver" finish (additional charge for Quick-Silver). This kit will not only allow your Corvette to stop better, it will also provide an appearance enhancement. Additionally, custom caliper colors are available by special order for an additional charge.

To round out the kit are radial mount caliper brackets with alignment shims, proper hardware, and spacers to use with either the 13.4" or 14.0" rotors.

Wilwood performance brake kits are loaded with cutting edge technology built on years of domination in world motorsports. Wilwood's Caliper Upgrade Kits are designed to meet the high performance demands of today's tire, wheel and suspension technology.
