

FOR IMMEDIATE RELEASE

Wilwood Disc Brakes Has Just Introduced Two New Performance Brake Kits for 1970-1973 Ford Mustangs

Camarillo, CA May 1, 2012

Wilwood Disc Brakes has just released two new front drag kits for 1970-73 Ford Mustangs that complement our current selection of street brake kits. The part number [140-11930](#) Front Drag Kit features Dynalite calipers and 11.75-inch solid steel rotors. The part number 140-11930-D Front Drag Kit features Dynalite calipers and 11.75-inch drilled steel rotors. FDL Front Drag kits are drag racing's most popular front brake kits. In addition to the 1970-73 Mustangs, the FDL kits are available for the popular muscle car spindles and select aftermarket front struts used on four-wheel disc cars weighing up to 2,800 pounds, or rear drum brake equipped cars weighing up to 2,400 pounds. Forged billet FDL four piston calipers mount directly to the spindle with a bolt-on bracket. Forged billet, five lug hubs with direct mount steel rotors combine to provide an average weight savings of over 30 pounds compared to stock drum or disc brakes. Kits include all new hardware, wheel bearings, seals and extra length lug studs. Both kits feature aluminum hub assemblies, Forged Dynalite calipers, aluminum rotor adapter plates, caliper brackets, BP-10 Smart Pads and all of the hardware required to finish the installation.

Wilwood high-performance drag kits are loaded with cutting edge technology built on years of domination in world motorsports and are engineered for easy bolt-on installation. Wilwood's brake enhancement kits are designed to meet the high performance demands of today's tire, wheel and suspension technology.
