

**FOR IMMEDIATE RELEASE:**

**Wilwood Disc Brakes introduces new performance upgrade brake kit for the 2005 – Present Ford Mustang**

**Camarillo, CA • July, 2012**

Wilwood Disc Brakes has recently introduced a front road race brake kit for the 2005 – present Ford Mustang that features the latest in disc brake technology. This track-tested brake kit not only provides better performance, but also huge improvements over the original brakes on the track where consistency counts.

Wilwood's road race brake kit offers performance braking solutions for the Mustang. This bolt-on brake kit features Wilwood's forged billet Superlite 4-piston ST radial mount calipers equipped with Thermlock pistons that clamp down on large 12.19" diameter GT slot pattern vented **Spec 37** rotors. The kit, part number [140-12508](#), comes with aluminum hats, mounting brackets, and all necessary hardware for an easy, bolt-on installation. Stainless steel braided flexline kit, part number [220-9111](#) is included with the kit to make for a professional installation.

Wilwood Disc Brakes 15H PolyMatrix high temperature racing brake pads come standard with this kit. Other brake pad compounds for other racing environments are also available.

All of Wilwood's performance brake kits are loaded with cutting edge technology built on years of domination in world motorsports. The Wilwood performance upgrade kit for the Mustang will not only exceed your braking demands, on and off the track, but also enhance the appearance of your fifth generation Mustang.
