

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Announces a new 15/16" Bore Tandem Master Cylinder for Mustangs

Camarillo, CA • December 2015

Wilwood's Tandem Master Cylinders provide a new option for matching cylinder output to caliper capacity with custom brake upgrades on single-pushrod, manual pedal brake systems. The high-capacity body is lightweight, adds high-tech style and has durability for the street or track. The machined billet lid captures a pressure-balancing bellows gasket that fully seals moisture out and keeps fluid in.

Standard finishes include bright media burnished for a polished look, black e-coat or plain aluminum. The master cylinders are available as stand-alone units or can be purchased in a kit. Tandem Master Cylinder kits include the master cylinder, Combination Proportioning Valve, mounting bracket, pre-bent fluid tubes and mounting hardware.

MSRP starts at \$248.34.
