

**FOR IMMEDIATE RELEASE:**

## **Wilwood Disc Brakes Announces New DynaPro Front and Rear Drag Race Brake Kits for the 2015-Present Ford Mustang**

**Camarillo, CA • March 2016**

Wilwood now offers three new drag race brake kits for the 2015-present Mustang. Two front kits include choices of either dynamic mount drilled steel rotors for dedicated "race-only" applications, or vented cast iron directional vane rotors for dual-purpose street/strip cars. The rear kit features dynamic mount drilled steel rotors without a parking brake to further eliminate unnecessary weight for drag race-only applications.

The kits are configured with the high-torque stopping power of DynaPro 4R four piston radial mount calipers and fast-response BP-20 compound *SmartPads*. Each kit mounts directly to the factory suspension for easy bolt-on installation.

MSRP starts at \$1,343.94.
