

**FOR IMMEDIATE RELEASE**  
**Wilwood Five Silicone Brake Fluid**

**Camarillo, CA July 27, 2010**

Show car builders and owners will be glad to know that Wilwood Engineering has just released a high quality silicone brake fluid that works perfectly in the company's brake systems and other applications where silicone brake fluid is specified. Show car builders like the benefit that silicone brake fluid does not harm paint finishes in case of a spill or leak. It can simply be wiped off of a paint surface without any harm.

Wilwood [FIVE](#) is a highly refined silicone brake fluid formulated to preserve the looks and reliability on classic vehicles and show cars. Its non-hygroscopic blend blocks moisture absorption to inhibit internal system corrosion. Wilwood FIVE provides superior lubrication for all brake system wear surfaces with long life from the master cylinder and caliper pistons, bores and seals. The fluid is fully DOT 5 compliant meeting or exceeding FMVSS116 and MIL-PRF-46176B-DOT specifications and can be used in custom vehicles and any vehicle that is OE specified for DOT 5 use. Wilwood does not recommend using DOT 5 fluid in any racing application.
