

**FOR IMMEDIATE RELEASE:
Wilwood Disc Brakes "DynaPro 6" Forged Billet Six-Piston Calipers**

Camarillo, CA, August 25, 2008

The [DP6](#) marks a noteworthy step in the evolution of the Wilwood DynaPro Caliper series. Engineering advancements with the DP6 design include a tighter profile radius and slimmer body width allowing easier wheel fitment. The DP6's overall shape provides better triangulation over the rotor delivering firmer pedal feel. DP6 calipers offer the performance advantages of a six-piston differential bore configuration and larger pads. Three unique piston size combinations allow the installation of six-piston calipers on all four corners of the car providing a powerful braking solution. DP6 calipers are available in Wilwood bolt-on brake kits, and individually as an excellent upgrade option for the Wilwood Dynalite caliper series. The DP6's stylish design features and elongated shape complement the appearance of custom open-spoke wheel designs. Caliper finishes include a premium-polished finish, red, black, and other custom Wilwood colors.
