

Compact Master Cylinder Firewall Mounting Kit

Kit Highlights:

- Wilwood has specifically designed a new Master Cylinder Firewall Mounting Kit to work in conjunction with Wilwood's Forward Mount Brake and Clutch Pedal Assembly and Flange Mounted Compact Remote Master Cylinders.
- Manufactured from billet aluminum and media burnished for that high-tech, pro-finish look that compliments any engine compartment.
- The kit allows for precision mounting of the pedal and master cylinders to the firewall while recessing the master cylinders .25" for more engine compartment clearance.
- Designed to accept a firewall material thickness range of .040" - .080", making this kit compatible with most vehicle applications.
- Included with the engine compartment faceplate and interior mounting plate are attractive, corrosion resistant stainless steel 12 point fasteners which provide years of trouble free service to complete the professional looking installation.
- Detailed instructions are included to make for an easy installation.

Firewall Mounting Kit, Typical Installation
