CAN-AM MAVERICK X3

2017-2023

BIG BRAKE KITS

Big Brake Kits 2017-23 Can-Am Maverick X3 UTVs

Wilwood is excited to bring premium performance brake kits to the Can-Am Maverick X3 UTV. An entirely new caliper and rotor design have been engineered and manufactured in the US using the same technology Wilwood has been employing for decades for race cars, trucks, and military vehicles, only scaled down appropriately for side-by-side rigs.

Fixed-mount **UTV6** front calipers are matched to **UTV4** rear calipers and use larger dynamically-mounted steel floating rotors to reduce piston knockback and improve thermal capacity.

KIT FEATURES:

- Larger, thicker, dynamically mounted 11.25" x 0.25" steel rotors eliminate knockback and reduce thermal distortion; available plain face or drilled
- Rigid, stress-flow net forged aluminum, opposed piston calipers with strengthened body reduces deflection and increases clamping efficiency
- Differential bore caliper pistons provide consistent engagement and increase pad life
- **UTV6** and **UTV4** calipers offered in gloss red and black powder coat, or many additional caliper color options (additional charges may apply)
- Standard kits come complete with fade-resistant **BP-10** brake pads, banjo bolt and crush washers to connect to factory lines
- Race-spec kits use Type III hard anodized calipers and more aggressive, fade-free **BP-28** brake pads
- Fully compatible with factory master cylinder, ABS, and pedals
- Kits fit most wheels 15" and larger

NEW!
