

XRZERO NEXT GENERATION ZERO DRAG RACE CALIPERS

Wilwood's next generation **XRZERO** race calipers combine decades of race experience, computer finite element analysis, and state-of-the-art machining into a race caliper that is lighter and stiffer, with **zero drag**. The unique high surface area body shape creates a caliper with superior brake fluid cooling and allows more air to flow through the rotor.

XRZ4R

FEATURES:

- Optimized profile high-temperature seals for better piston retraction and zero drag
- Unique center X-bridge strengthens caliper without adding mass or obstructing airflow
- FEA design and precision machining results in a caliper weighing just 4.66 pounds - 1/2 pound less than a comparable Wilwood Superlite
- Innovative high surface area body removes unnecessary bulk, improving cooling without increased deflection
- Hard-anodized inside and out with durable Type III aluminum-oxide ceramic finish
- Staggered-bore front calipers provide more even engagement and improved pad wear
- Thermlock® thermal barrier pistons and high-temperature seals reduce heat transfer to fluid
- Single-point bleed technology with low-profile bleed screws for more efficient fluid bleeding
- No-bind retaining pins hold your choice of race compound brake pads
- 0.80"/20.3mm thick brake pads for extended service life
- Three piston sizes for front and rear use and 0.81" or 1.25" width rotors
- Includes 3/8-24 banjo bolt and fitting to connect caliper inlet to -3 flex line

Pad Retaining Pin P/N 180-14649
