EPB - ELECTRIC PARKING BRAKE CALIPERS & ACCESSORIES

Wilwood's EPB Electric Parking Brake Caliper is a stand-alone, multi-use brake caliper that combines high static-hold performance with simple installation - no need to route cables. It is the perfect parking brake solution for cars, trucks, agricultural, utility, and powersports vehicles with disc brakes. Complete kits are available for the most popular rear differentials.

A microprocessor-based controller delivers the same clamping force every time and draws no power once applied. Universal wiring harness and dashboard momentary-on three position switch are included in kits and sold separately.

Left-Hand Motor, 4.75" Center Mount
Type-III Hard Ano Finish

Right-Hand Motor, 4.75" Center Mount
Gloss Red Powder Coat Finish

Right-Hand Motor, 2.00" Offset Mount
Gloss Black Powder Coat Finish

EPB CALIPER FEATURES

- Electric motor and gear drive provides a minimum of 2400lbs of clamping force with no electrical draw after activation
- Strong, forged aluminum calipers body and anvil with a steel mounting bracket
- Brackets with 4.75" centered or 2.00" offset holes for easy adaptability
- Left and right-handed versions available for ease of installation
- Fits a wide variety of automotive and powersport vehicles with rotors from 0.15" to 1.25" wide, and 11.00" - 15.00" diameters
- Replaceable **BP-10** brake pads
- Mounts to the same brackets as the Wilwood MC4 mechanical parking brake caliper to make upgrading old kits easier
- Slim profile (1.26") control module for single or dual calipers, mounts where convenient

EPB, Left-Hand Motor
Shown with mounting bracket available separately for select Wilwood calipers, and included in complete rear brake kits with EPBs
