

FORD F-150 TX6R FRONT BIG BRAKE KITS 2004-2024

Wilwood has expanded the fitment range for the powerful TX6R big brake kits to include late model Ford F-150 pickup trucks up to 2024.

Bolt-on big brake kits replace OEM sliding calipers with Wilwood rigid forged aluminum **Tactical Xtreme TX6R** six piston calipers. Lightweight aluminum hats add to the reduction of unsprung rotating mass helping improve vehicle performance and provide better brake torque.

Designed to fit most 20" and larger wheels for off-road, hauling, towing, commercial, and heavy-duty highway use.

KIT FEATURES:

- Same Wilwood components used on tactical armored vehicles up to 14,000 lbs GVWR
- Larger vented rotors provide greater brake torque and more thermal capacity, plus increased pad volume

CALIPERS: TX6R

- Stress-flow forged aluminum radial mount calipers with reinforced end bridges for increased rigidity
- Six pistons with differential bores for smoother engagement and more even pad wear
- Volume-matched to be fully compatible with the factory master cylinder, ABS and electronic controls
- Available in gloss red or black powder coat, 24 other color options available (additional charges apply)

ROTORS: GTB SLOTTED

- Big 15.50" proprietary military-grade iron alloy rotors
- Non-directional 72 staggered internal cooling vanes shed heat quickly
- Black E-coat protection throughout with **GTB** slotted face

BRAKE PADS: BP-Q

- Fade-resistant **BP-Q** compound brake pads included (additional compounds available)

INSTALLATION PARTS:

- Stainless steel Flexlines and premium-grade hardware included
