

## SKYLINE R33 GT-R 1995-98 BIG BRAKE KITS FRONT & REAR

Wilwood has designed high-performance brake kits for the popular JDM Nissan Skyline R33 generation GT-R, built for comfort and track performance with a racing heritage.

Big brake kits are now being produced in two rotor sizes for the front, with a choice of Wilwood's esteemed six piston **Superlite** or **Aerolite** calipers, and a bias-matched four piston **Superlite** caliper for the single rear rotor size.

### KIT FEATURES:

- Powerhouse caliper options with modern FEA body design for increased strength and better resistance to deflection providing improved pedal feel
- Fully compatible with OE ABS, electronic controls, and master cylinder

### CALIPERS: FNSSL or AER06R

- Forged **Narrow Superlite 6R** six piston front, and **4R** four piston rear aluminum calipers have exceptional strength with reduced weight
- **Aerolite 6R**, six piston front, forged aluminum caliper features a stiffened center bridge
- Calipers available in gloss black or red powder coat, or many additional color options (additional charges apply)

### ROTOR: GTB Slotted, or SRP Drilled & Slotted

- Front 12.88" or 14.00" x 1.25" wide (327.2mm or 355.6mm x 31.8mm), performance-grade iron alloy with 48 curved vanes for efficient cooling
- Rear 13.50" x .81" wide (342.9mm x 20.6mm), performance-grade iron alloy with 36 vanes for efficient cooling
- Black E-coat protection comes standard with **GTB** slotted and **SRP** drilled and slotted faces

### BRAKE PADS: BP-10, BP-20 (other compounds available)

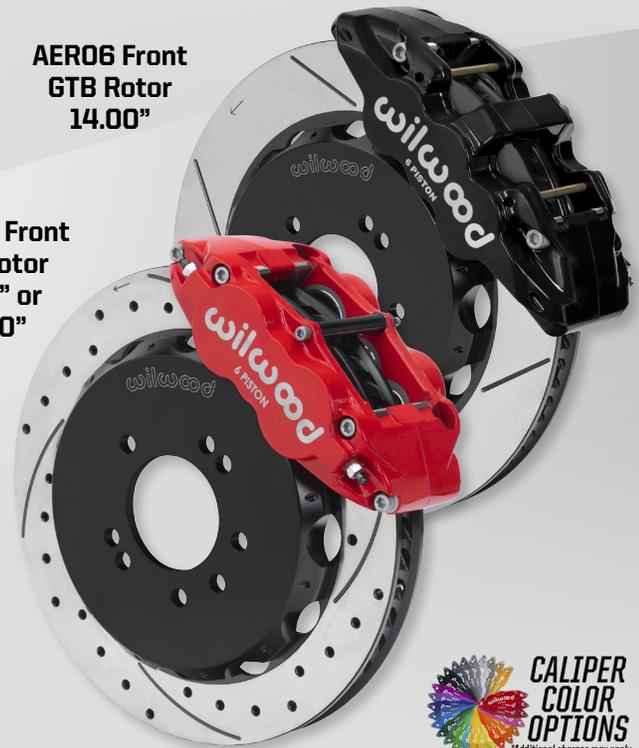

- **BP-10** pads are included in kits with **SRP** rotors providing a smooth and consistent response with long wear for street performance
- **BP-20** pads come in kits with **GTB** rotors providing more friction and higher performance for street, autocross, and track day use

### INSTALLATION PARTS:

- All premium-grade hardware included; Flexlines included in front kits and are available separately for rear kits based on YMM

**AER06 Front
