

240SX '89-98 BIG BRAKE KITS FRONT & REAR

Wilwood has designed high-performance brake kits for the popular Nissan **240SX** spanning two chassis, the **S13** (1989-94) and **S14** (1995-98). The 240SX is known for its lightweight, balanced handling with tremendous tuning potential, including drifting.

Big brake kits are now available in two rotor sizes for the front with options for Wilwood's esteemed six piston **Superlite** or **Aerolite** calipers, and a bias-matched four piston Superlite caliper for the rear kits, which also includes Wilwood's external **MC4** parking brake.

Note: Rear kit fitment with MC4 parking brake requires a separate Wilwood cable kit and an aftermarket non-hoop style RUCA (rear upper control arm).

KIT FEATURES:

- Powerhouse caliper options with modern FEA body design for increased strength and better resistance to deflection providing improved pedal feel
- Fully compatible with OE ABS, electronic controls, and master cylinder

CALIPERS: AERO6R, FNSSL

- **Aerolite 6R**, six piston front, forged aluminum caliper features a stiffened center bridge
- **Forged Narrow Superlite 6R**, six piston front, and **4R** four piston rear aluminum calipers have exceptional strength with reduced weight
- Calipers available in gloss black or red powder coat, or many additional color options (additional charges apply)

ROTOR: GTB Slotted, or SRP Drilled & Slotted

- Front 12.88" or 14.00" x 1.25" wide (327.2mm or 355.6mm x 31.8mm), performance-grade iron alloy with 48 curved vanes for efficient cooling
- Rear 13.50" x .81" wide (342.9mm x 20.6mm), performance-grade iron alloy with 36 vanes for efficient cooling
- Black E-coat protection comes standard with **GTB** slotted or **SRP** drilled and slotted rotor faces

BRAKE PADS: BP-10, BP-20 (other compounds available)

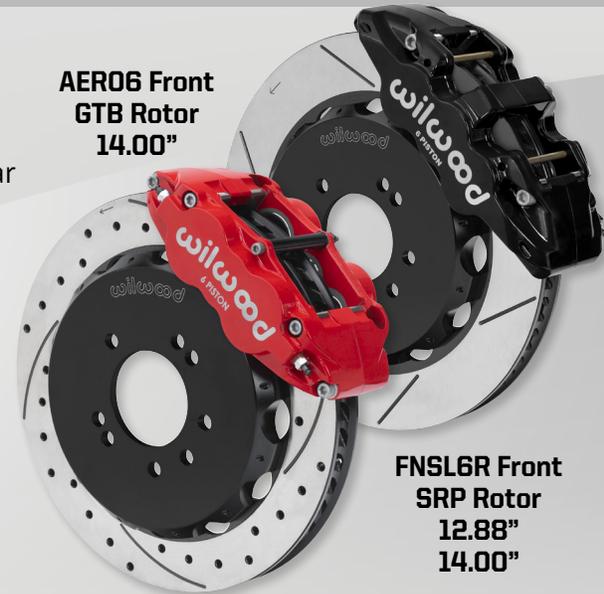

- **BP-10** pads are included in kits with **SRP** drilled and slotted rotors providing a smooth and consistent response with long wear for street performance
- **BP-20** pads come in kits with **GTB** slotted rotors providing more friction and higher performance for street, autocross, and track day use

INSTALLATION PARTS:

- All premium-grade hardware included; Flexlines and parking brake cable kits are available separately by YMM

**AERO6 Front
GTB Rotor
14.00"**

**FNSSL6 Front
SRP Rotor
12.88"
14.00"**

FNSSL4R Rear SRP & GTB Rotors 13.50"
with external MC4 Park Brake*
*(see note next page)

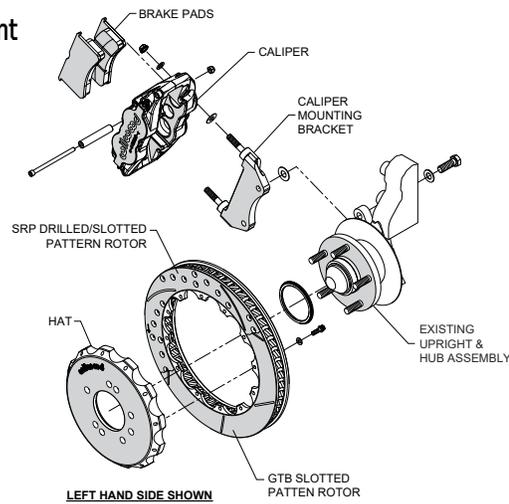

**MC4 Park Brake
Cable Kit**

Typical Installation Diagram - 12.88" Front

WARNING
INSTALLATION OF THIS KIT SHOULD **ONLY** BE PERFORMED BY PERSONS EXPERIENCED IN THE INSTALLATION AND PROPER OPERATION OF DISC BRAKE SYSTEMS.

NOTE
SPECIFIC PARTS MAY VARY FROM DIAGRAM

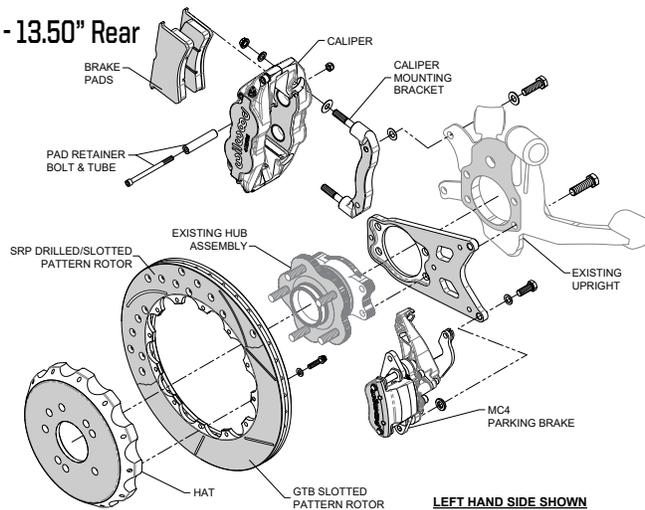

LEFT HAND SIDE SHOWN

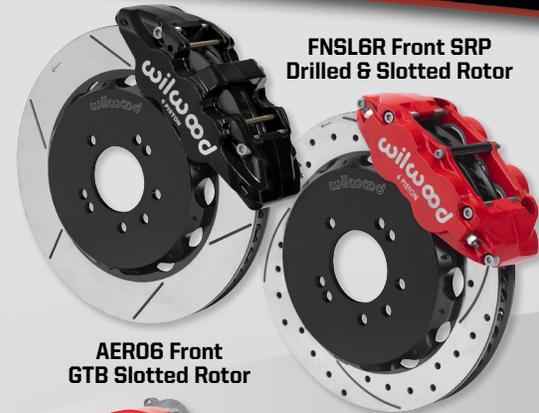

Typical Installation Diagram - 13.50" Rear
