NEXT-GEN

PERFORMANCE BRAKING

Our new line of **XRS4R** rear brake kits is now available in configurations engineered to fit 5-lug Chevy C-10 Truck rear axles, 1963-87, with a 2.42" offset. The XRS4R is the next generation of hi-tech calipers, combining decades of experience from both race and street performance. Brake kits are available with 12.88" rotors in **GTB** slotted or **SRP** drilled and slotted styles. Choose your caliper color from gloss red or gloss black powder coat.

The XRS4R is a direct replacement for any radial mount FNSL4R, so upgrading an older build is as simple as replacing the caliper and pads for immediate performance gains.

KIT FEATURES:

- **XRS4R** Calipers with distinctive X-bridge design blends strength with modern engineering
- Two-piece rotor and aluminum hat assemblies are designed for increased thermal/heat dissipation and improved performance and longevity

CALIPERS: XRS4R

- 4 piston radial mount with center X-bridge strengthens the caliper body with reduced mass
- Modern computer FEA design, precision CNC machining resulting in a weight of only 4.5 lbs.
- Premium-grade forged aluminum provides a lighter design with more rigidity
- Inherent caliper design allows improved airflow and cooling for increased performance and control
- Available in Gloss Black or Competition Red powder coat with many other color options (additional charges apply)

ROTORS: GTB Slotted or SRP Drilled & Slotted

- 12.88" GTB slotted or SRP drilled & slotted **Spec37** rotors are 1.10" wide with 48 curved vanes
- GTB and SRP rotors are black E-coated for better corrosion resistance

PADS: BP-10

- **BP-10** street performance pads provide smooth and consistent response with long wear (other compounds available)

INSTALLATION PARTS:

- Caliper brackets and premium-grade installation hardware included.
- Flexline kits available separately by application
