

Floor Mount Triple Pedal Assembly

This floor mount pedal assembly has a brake / clutch / throttle triple pedal design. There are three individual fabricated steel pedals with non-slip pedal pads to control brake, clutch and throttle. Pedal assembly part number [340-12410](#) is for rear engine cars and part number [340-12411](#) is for front engine cars. Both units feature an aluminum frame with strong lightweight fabricated steel pedal arms. The frame and the pedal arms have a black e-coat finish for protection and an attractive appearance. Also included with the pedal assembly are mounting studs, clevises, and balance bar assembly that is designed to provide smooth and accurate settings of the brake pedal bias. The balance bar can be set and locked down with the jam nut, or attached to a remote cable for quick on-track adjustments. The pedal assembly provides a 5.25 to 1 nominal ratio.

Assembly Instructions:

Pedal assembly part number 340-12410 requires the customer to do the final assembly of the throttle pedal to the main pedal assembly. Kit part number 340-12411 requires using the same procedure as part number 340-12410 with the additional step of installing the throttle linkage assembly, part number 340-12412 that is necessary for front engine vehicles.

The [master cylinders](#) and the brake pedal are sold separately.
