

FOR IMMEDIATE PRESS RELEASE
Wilwood Brake Kits for C5 & C6 Corvettes

Camarillo, CA June 3, 2010

Wilwood Engineering announces improved good looks and braking performance for C5 & C6 Corvettes. These new front and rear brake kits are designed for easy bolt-on installation and are compatible with the OE master cylinder and ABS system.

Front kits (p/n [140-8031](#)) include billet CNC machined Superlite 6-piston calipers in red, black, or silver finish clamping down on a 13" or 14" diameter, curved vane rotors. Choose rotors in a drilled and slotted (SRP) pattern or slotted only (GT) for high heat applications, mated to black "signature" anodized aluminum hats for reduced rotating weight and improved stability under thermal load.

Rear kits (p/n [140-8032](#)) include billet Superlite 4-piston calipers, also in a red, black, or silver finish and like the front, come with a choice of SRP or GT, two-piece 13" or 14" diameter curved-vane rotors with iron hats to accommodate the OE parking brake function.

Additional kit highlights include Wilwood's new Bp-10 Smart Pads for low noise, and low dust, precision machined caliper brackets, high-strength, corrosion resistant mounting hardware.

Delivering high performance with style, these brake kits from Wilwood are the perfect upgrade for any C5 or C6 enthusiast who is serious about sport driving or enjoys hot lapping in track day sessions.
