

**FOR IMMEDIATE RELEASE:**

## **Wilwood Disc Brakes Introduces New Line of Forged Aluminum Pedal Assemblies**

**Camarillo, CA • May, 2015**

Wilwood Disc Brakes has expanded their pedal line with all new, lightweight, super-strong, forged aluminum pedal assemblies. The pedals are built around a forged I-Beam arm design incorporating a laterally adjustable, non-slip waffled foot pad. Wilwood's full range of single, dual, and triple cylinder mount models has been duplicated, along with a new reverse swing mount single cylinder model.

Wilwood pedals are available in a variety of ratios and configurations for floor or overhead swing mount, with reverse and forward cylinder mount options available in most styles. Pedals also feature Wilwood's signature black e-coat finish for long lasting, durable protection.

Master cylinders, brake bias adjuster cables, and horizontal flange adapter kits are all sold separately.

M.S.R.P. begins at \$83.03.
