

**FOR IMMEDIATE RELEASE:**

## **Wilwood Introduces Tandem Brake and Hydraulic Clutch Master Cylinder Pedal Assembly**

**Camarillo, CA • November 2017**

Wilwood's two newest pedal assemblies simplify the installation of tandem outlet brake master cylinders in vehicles also equipped with a hydraulic clutch. Most racing pedals are designed to only accept vertical mount flange, single outlet master cylinders. These new pedal assemblies are specifically designed for conventional horizontal mount flange, single pushrod, tandem outlet master cylinders on the brake side.

It is the perfect choice for all types of hot rods, purpose-built vehicles, and racecars where a brake balance bar is either not practical, not desired, or not allowed by rules. Models are available with either 6.25:1 or 7.00:1 leverage ratios.

MSRP starts at \$244.02.
