

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Introduces a '55-'57 Chevy Front and Rear Disc Brake Kit

Camarillo, CA June 15, 2010

Wilwood Engineering has just released a disc brake kit for '55-'57 Chevys that allows the use of aftermarket 14-inch wheels to retain the appearance of a restored Chevy with the enhanced stopping ability of disc brakes for driving safety. The Forged Dynalite Pro Front Kit is Wilwood part number [140-11491](#) and it features an aluminum hub assembly and an aluminum adapter plate connected to 11-inch rotors. Forged Dynalite calipers are used for their superior clamping ability and they are available red, black or in a polished finish for a show car appearance. This kit comes complete with the special caliper brackets, BP-10 brake pads and all of the hardware required to complete the installation. The Wilwood part number [140-11405](#) Forged Dynapro Rear P-Brake Kit is designed for the original '55-'57 Chevy differential and it features Forged Dynapro calipers in red, black or in a polished finish for a show car appearance. This system uses an 11-inch rotor specially designed for use with an internal drum parking brake mechanism that also incorporates the caliper mounting bracket. This kit also comes with the BP-10 brake pads and all of the hardware required to finish the installation. Now you can have the appearance of a restored Chevy with the stopping ability of a brand new car.
