

FOR IMMEDIATE RELEASE:

## Wilwood Racing Releases Tru-Bar Adjustable Race Pedal Assemblies

Camarillo, CA • October 2022

Wilwood Racing's new forged aluminum race pedals now adjust for leverage ratio, plus horizontal pad placement. The innovative design allows vertical pedal pad adjustment for fine-tuning pedal feel and performance. Combined with Wilwood's precision front-to-rear bias control Tru-Bar system, these pedals are like no other.

Pedals are offered in single or combinations, forward or reverse swing, and hanging or floor mounts. The adjustable pedal head mounts in one of three vertical positions to adjust the pedal leverage ratio. The foot pads also adjust to three positions horizontally (up to 1") to fine-tune spacing between pedals. New adjustable design kits are available to upgrade arms of most existing Wilwood pedal assemblies.

**MSRP:** starts at \$457.95
