

**FOR IMMEDIATE RELEASE:**

## **Wilwood Disc Brakes Releases Aero6-DM Direct-Mount Brake Kits for Ford F-150 and Raptor Trucks**

**Camarillo, CA • February 2023**

Performance trucks are the new muscle car, and Wilwood has engineered direct-mount, bolt-on brake upgrades to increase their braking performance. Designed to fit most 17" or larger wheels on the 2010-20 Ford F-150 (and related SUVs), 2010-14 SVT Raptor, and 2017-25 Raptor. These brake kits provide more holding power and easier modulation at low speeds, and more thermal capacity for all types of high-demand highway and off-road applications, including towing, hauling, and commercial use.

Forged aluminum Aero6-DM six piston Aerolite direct-mount calipers deliver improved clamping force and are compatible with OEM rear brakes, master cylinder, ABS, and computer systems. Rotors are 13.38" x 1.25" premium long-grain carbon, iron alloy, and substantially increase braking performance when paired with new Wilwood BP-"Q" ceramic-based, dual-sport SmartPad® brake pads, formulated for everyday street or performance driving. Rotors are available GT slotted or SRP drilled and slotted. Calipers are available in gloss red or black powder coat and 22 additional colors (additional charges may apply). Includes Wilwood stainless steel braided flexline kit.

**MSRP:** starts at \$1,787.50
