

DISC BRAKES wilwood

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Aero6-DM Front Brake Kits for 2007 to 2015 Toyota Tundra Camarillo, CA • May 2026

Wilwood announces the release of new front **Aero6-DM** “Direct-Mount” bolt-on brake kits for the popular 2007-2015 Toyota Tundra 2WD and 4WD trucks, developed specifically for ease of installation, reduced cost, and upgrading the stock rotors and heavy cast-iron calipers. These kits are designed to work with most 17” and larger wheels and be fully compatible with factory master cylinders, ABS, and all electronic controls.

The Aero6-DM kits deliver improved performance and repeatability, with a more confident pedal feel for braking in all driving conditions. Both larger brake pads and rotors have more thermal capacity, allowing better heat dissipation for high-demand highway, off-road, towing, hauling, and commercial workload applications that many of these Tundras endure.

Forged aluminum six piston Aerolite calipers are engineered to bolt directly to the Tundra’s spindles/hubs, simplifying installation. Premium vented and e-coated rotors, 13.39” x 1.26”, are available in either **GTB** slotted, or **SRP** drilled and slotted, featuring 66 vanes for improved thermal management and braking performance. The kit includes new Wilwood **BP-22** ceramic-based compound brake pads formulated for street, off-road, or towing applications. Calipers are available in gloss red or black powder coat with many other color options (additional charges apply). Stainless steel Flexlines and premium-grade hardware included. Visit www.wilwood.com for more information.

MSRP: starts at \$1,966.26
