

DISC BRAKES **wilwood**

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Big Brake Kit Options for 1989-98 Nissan 240SX

Camarillo, CA • February 2026

Wilwood has engineered and is manufacturing new high-performance big brake kits for the popular Nissan 240SX spanning two chassis, the S13 (1989-94) and S14 (1995-98). The 240SX is known for its lightweight, balanced handling and is a favorite for tuners to work with, including the drifting community.

Front big brake kits are offered in two sizes, a 12.88" rotor and a 14.00" rotor, with a single rear 13.50" rotor. Rotors are vented and available in black E-coat **SRP** drilled and slotted with **BP-10** street performance pad compound, or **GTB** slotted with **BP-20** pads for more friction for higher performance, including autocross and track day events. Two of Wilwood's esteemed, forged aluminum powerhouse calipers are available for the front axle. Choose a six piston **Superlite FNSL6R** or **Aerolite AERO6** and add a biased-matched four piston **Superlite FNSL4R** to the rear axle. Note that rear kits include an **MC4** parking brake caliper that requires a separate Wilwood cable kit, plus an aftermarket non-hoop style RUCA (rear upper control arm) to be installed.

All big brake kits are compatible with OE electronic controls, ABS, and the master cylinder. Calipers are available in gloss red or gloss black powder coat, or many other color options (additional charges apply). Premium-grade installation hardware is included, and Wilwood's stainless steel **Flexlines** are available separately for the specific year, make, and model configuration.

MSRP: starts at \$2,907.51
