

Big Brake Kits **2014-23 Polaris RZR** 4-Lug XP 1000, XP TURBO, PRO XP, TURBO S, RS1

Wilwood brings performance brake kits to the Polaris RZR 4-lug lineup. UTV-specific caliper and rotor design for 4x156 mm lug patterns are engineered and manufactured in the USA. Front and rear-matched kits use fixed-mount **UTV6** six piston calipers with increased pad volume, plus larger dynamically-mounted steel floating rotors to reduce piston knockback and improve thermal capacity.

Our UTV kits utilize the same engineering and manufacturing technology Wilwood uses on brakes for race cars, trucks, and armored military vehicles, scaled down appropriately to improve performance on side-by-side rigs.

KIT FEATURES:

- Up to 20% larger dynamically mounted 11.25" x 0.25" steel rotors reduce knockback and thermal distortion; available plain face or drilled
- Rigid, stress-flow net forged aluminum, **UTV6** opposed piston calipers with strengthened body reduces deflection and increases clamping efficiency
- Differential bore caliper pistons increase pad life and maintain proper front/rear bias
- Calipers offered in gloss red and black powder coat, or many additional caliper color options (additional charges may apply)
- Standard kits come complete with fade-resistant **BP-10** brake pads, banjo bolt and crush washers to connect to factory lines
- Race-spec kits use Type III hard anodized calipers and more aggressive, fade-free **BP-28** brake pads
- Fully compatible with factory master cylinder, ABS, and pedals
- Kits fit most wheels 15" and larger

NEW!
