

FOR IMMEDIATE PRESS RELEASE:

Wilwood's New Pro Big Brake Rear Kits for Late Model GM Trucks & SUV's

Camarillo, CA June 3, 2010

Wilwood Engineering announces the new Big Brake Rear Kits for late model 1500 GM trucks and SUV's (p/n [140-9188](#)). Designed to compliment Wilwood's Big Brake front kits, these rear kits feature billet Superlite 4-piston calipers in red or black finish, clamping PolyMatrix pads on a one-piece iron hat and 13" drilled and slotted SRP or slotted GT rotor. Like the fronts, these rear kits are compatible with the OE ABS and master cylinders. The popularity of converting to large oversize wheels and tires for a customized look on trucks and SUV's has also increased the need for the improved braking offered in Wilwood's Front and Rear Big Brake systems.
