

FOR IMMEDIATE RELEASE:

## Wilwood Disc Brakes Releases Big Brake Kits for Can-Am Maverick X3 UTVs

Camarillo, CA • January 2023

Wilwood is pleased to launch an entirely new caliper and rotor design for the Can-Am Maverick X3 UTV platform from 2017-21. Fixed-mount six piston front calipers are matched to four piston rear with larger dynamically-mounted floating rotors to reduce piston knockback, improve thermal capacity, and will fit most 15" or larger wheels.

Forged aluminum differential bore opposed piston UTV6 and UTV4 calipers give balanced clamping with reduced deflection for more braking force. Thicker, larger diameter 11.25" x 0.25" (285mm x 6mm) steel rotors create greater torque with less heat distortion, and are available plain faced or drilled. Calipers are available in glossy red or black powder coat or 22 additional color options (additional charges may apply).

**MSRP:** starts at \$1,414.91
