

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases New Six Piston Dynapro Big Brake Kit for 1973-83 Dodge, Chrysler, and Plymouth

Camarillo, CA • August 2023

Wilwood is pleased to announce a modern big brake kit for 1973-83 Mopar models that fit most 15" or larger wheels. New aluminum brackets mount Wilwood's race-proven Dynapro six piston calipers and performance rotors to 1973-83 Dodge, Chrysler, and Plymouth A, B, E, F, and J-Body cars with no modification while reducing weight over OE components.

High-strength Dynapro DP6A forged aluminum calipers feature a central stiffening bridge to reduce deflection, improve performance and pedal feel. Rotors are more than an inch larger than stock providing more brake torque and thermal capacity. Choose Ultralite HP plain face 32 straight vane or SRP drilled and slotted 32 curved vane rotors measuring 12.19" x 0.81". Calipers come finished in high gloss red or black powder coat or 22 other color options (additional charges may apply). In addition to the high-strength brackets, kits include rotor adapter plates, hubs, and all mounting hardware. Stainless steel Wilwood Flexlines are available separately.

MSRP: starts at \$1,292.81
