

**FOR IMMEDIATE RELEASE:**

**Wilwood's new brake kit for the 2002 – present Mini Cooper**

**Camarillo, CA, September 1, 2011**

Wilwood Engineering has recently introduced a front road race brake kit for the 2002 – present Mini Cooper and Mini Cooper "S" that features the latest in disc brake technology. This track-tested kit not only provides better performance, but also huge improvements over the original brakes on the track where consistency counts.

Wilwood's road race brake kit offers performance braking solutions for the Mini Cooper. Kit features Wilwood's forged billet DynaPro 4-piston radial mount calipers that clamp down on large 11.75" diameter GT slot pattern vented rotors. The kit, part number [140-8740](#), comes with aluminum hats, mounting brackets and all necessary hardware for an easy, bolt-on installation.

Wilwood BP-10 high performance street pads round out the kit. Other brake pad compounds, including those for off-road applications, are also available. Stainless steel braided flexline kit, part number 220-8491, is necessary and must be ordered separately.

All of Wilwood's performance brake kits are loaded with cutting edge technology built on years of domination in world motorsports. This kit will not only exceed your braking demands, on and off the track, but also enhance the appearance of your Mini Cooper.
