

**FOR IMMEDIATE RELEASE:**

## **Wilwood Racing Welcomes Trent Thomasson to Sales & Technical Support Team**

**Camarillo, CA • April 2026**

Wilwood Racing Division, a leading manufacturer of high-performance brake systems and components for motorsports and performance vehicles, announced today that Trent Thomasson has joined the company in a Sales & Technical Support role.

Trent Thomasson, Wilwood Racing's new Sales and Technical Support Team Member

In his new position, Thomasson will work directly with racers, builders, and dealers to provide technical guidance, product application support, and sales assistance across Wilwood's extensive motorsports and performance brake product lines. His role will help ensure customers receive informed recommendations and responsive technical service tailored to their specific racing and vehicle requirements.

"Trent brings a strong combination of technical understanding and customer-focused problem-solving to the Wilwood Racing Division," said Dave Brzozowski, Racing Manager. "His extensive history working at performance brake companies with leading national asphalt race categories, plus his ability to communicate clearly with racers and industry professionals, will be a valuable asset as we continue to support a wide range of motorsports disciplines and performance markets."

Thomasson's main role will be to support teams and dealers in the asphalt oval market, reinforcing Wilwood's commitment to hands-on technical expertise and customer service excellence.

Wilwood's Sales & Technical Support team plays a critical role in bridging engineering, production, and end users, to help customers optimize brake system performance, select the correct components, and implement proven solutions for track, street, and high-level competitive environments.

### **About Wilwood Engineering**

Founded by Bill Wood in 1977, Wilwood Engineering designs and manufactures high-performance disc brakes and components from their headquarters in Camarillo, California. Products are engineered and rigorously tested for any application, creating unsurpassed braking quality and performance with sleek, modern designs.
